DETAILED ACTION

Response to Amendment

This communication is in response to the amendment of 2/2/2006. All changes made to the Claims have been entered. Accordingly, Claims 1-36 are currently pending in the application.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kurt M. Berger on 7/27/2006.

The application has been amended as follows:

2. -Claim 11 has been amended as seen in the attached amendment **A**.
3. -Claim 28 has been amended as seen in the attached amendment **A**.
4. -Claim 36 has been amended as seen in the attached amendment **A**.

Allowable Subject Matter

5. Claims 1-36 are allowed.

The following is an examiner's statement for reason for allowance:

6. Claim 1, 11, 18, 28, 35, and 36 is allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose **assigning to the virtual ports respective port costs that are responsive to a count of the network segments with which the respective virtual connections coincide, so as to favor virtual paths between pairs of the nodes that are made up of a greater number of the virtual connections, relative to the virtual paths that are made up of a lesser number of the virtual connections.** It is noted that the closest prior art, Gai (US 6678241) discloses a method and apparatus for quickly identifying and selecting loop-free topologies in computer networks. However, the combination of Gai fails to disclose or render obvious the above underlined limitations as claimed.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
